Professional Summary

Experienced Technical Writer and Program Manager with over 20 years of expertise in technical documentation, project management, and analytics within the technology sector. Skilled in leveraging AI tools, including ChatGPT, to enhance documentation processes and deliver innovative solutions. Proven ability to manage complex projects, create high-quality technical content, and drive strategic initiatives in fast-paced environments.

Core Competencies

- AI Integration in Documentation Processes
- Technical Writing and Editing (DITA, XML Tools)
- Project and Program Management
- Data Analytics and Visualization
- Instructional Design and Training
- Tools: ChatGPT, Ixiasoft, XMetal, FrameMaker, Jira, Visio, Adobe Illustrator, Acrobat Pro

Professional Experience**ADP – Technical Writer (2022–2025)**

- Created and administered associate-facing content using DITA methodologies and XML tools.
- Consulted on the implementation of Salesforce knowledge modules to streamline content delivery.
- Contributed to the development of a ChatGPT-based DITA refactoring application, enhancing content creation efficiency and accuracy.
- Collaborated with cross-functional teams to ensure alignment of technical documentation with organizational goals.

Nike EAP/CSE – Technical Writer (2021)

- Supported the launch of open-source data tools within corporate Nike, including Kafka and NiFi.
- Developed storyboards for data analysis processes, integrating AI-driven insights to optimize workflows.
- Partnered with engineering teams to create technical documentation for internal and external stakeholders.

VersaLogic Corp – Technical Writer (2016–2021)

- Sole technical writer responsible for all public-facing hardware and software documentation for Intel x86 architecture-based products.
- Managed the largest release of new product documentation in company history, ensuring accuracy and clarity.

- Collaborated with engineering teams to produce detailed technical manuals, datasheets, and user guides.

Intel Corporation – Senior Technical Writer / Operations Manager / Project Manager (2000–2016)

- Managed Intel x86 architecture documentation, customer access, and confidential materials.
- Oversaw the growth of the Intel ESAA program from 20 to 2,000 members, managing external partnerships and cross-functional teams.
- Increased traffic to Intel's server product web pages by 3x through strategic content management and analytics-driven design.
- Developed technical collateral and training materials for engineering and marketing teams.

Worksystems Inc. – Data Analyst / Technical Writer (1998–2000)

- Designed and implemented large databases for state and federal agencies, performing data analysis to inform policy decisions.
- Created internet-based government transmissions and reports for contract compliance.

University of Oregon Continuation Center – Senior Instructor (1990–1998)

- Developed and delivered technical training courses tailored to corporate clients.
- Negotiated corporate training contracts and mentored staff to ensure high-quality instruction.

Education

Bachelor of Arts in History, Minor in Economics – University of Montana

Post-graduate studies in Applied Information Management – University of Oregon

AI-Related Achievements

- Developed a ChatGPT-based DITA refactoring application to streamline technical writing processes.
- Integrated AI tools into documentation workflows, improving content accuracy and reducing production time.
- Supported AI-driven data analysis processes at Nike, optimizing workflows and enhancing decision-making.
