Richard Punches

Technical Writer/Instructional Designer

My work-life has included: being part of internal start-ups at Intel, teaching Oracle database server installation at the Samsung offices in Seoul, delivering years of classroom instruction on top of the usual tech writer stuff.

Senior Technical Writer – VersaLogic Corp (2016 – Present)

I own all technical documentation from product development to end-of life. In 2017, I oversaw the largest release to new product documentation in the history of the company.

Senior Technical Writer/ DITA Development, Intel Internet Service Provider Division – PTI Global for Intel Corporation, Hillsboro, OR (2015 – 2016)

Develop online customer documentation for Intel modem and gateway products using DITA and XML tools

Senior Technical Writer/ Documentation Management, Intel PCCG – PTI Global for Intel Corporation, Hillsboro, OR (2009 – 2015)

Operations Manager, Intel® ESAA Software Solution - Intel Corporation, Hillsboro, OR (2000 – 2006)

The Intel® ESAA program accelerates delivery of integrated, validated hardware and software solutions to Intel OEM customers and resellers, allowing companies to compete more effectively with large, global system integrators.

- Key player on team that oversaw program growth from 20 to 2000 members over 8 years
- Managed day-to-day operations of engineering, managerial, marketing, and web development cross-divisional teams
- Managed external partner relationships with software vendors and hardware resellers
- Provided business analytics to Intel management and external ESAA partners that drove strategic business direction
- Created, edited and validated over 300 technical software installation documents
- Provided technical support to hardware resellers, strategic customers, and internal stakeholders

Project Manager/Business Unit Web Manager - Intel Corporation, Hillsboro, OR (2004 – 2006)

- Oversaw all facets of Intel server product web page: Design, development, marketing, technical knowledge
- Instituted metrics-based design and decision-making by providing management with deep web metrics on a monthly basis

Oracle Developer/Performance Analyst – Worksystems Inc. Portland, OR (1998 - 2000)

Developed internet-based government transmissions, reports and queries which ensured fact-based policy decisions and enabled contract compliance by management. Lead developer for user-based database forms and reports.

Senior Instructor, University of Oregon Continuation Center (1996-1998) Instructor, University of Oregon Continuation Center, Portland, OR (1990 - 1996)

- Taught both corporate and public classes for business applications and database design
- Technical document development for use in the class
- Staff development/mentoring
- Corporate training contract negotiation
